90121
Ambulatory Blood Pressure
Report Management System

Summary

Interfaces to the 90202, 90207, and 90217 Ambulatory Blood Pressure Monitors.

Windows-based, mouse-driven software for ease of use.

Supports Windows *Clipboard* Cut and Paste operations for moving data between Windows applications such as Word, Excel, and Lotus.

Facilitates selection of measurement intervals, inflation frequencies, display of graphic or tabular data, data analysis, and data transfer.

Choice of multiple user-configurable report formats and commonly used data entries to simplify redundant entries.

Supports importing/exporting of data between the 90219-02/90219-03 PC Direct/Base Station Interfaces and 90219-05 analysis software, as well as exporting of raw ASCII data files, faxing, and simultaneously reviewing and editing of multiple reports.
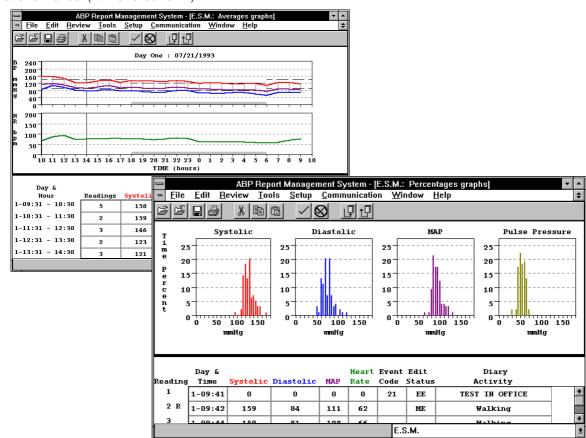

Supports remote communications for remote monitor programming and data retrieval.
